

# FLEX FARM

## What is a Flex Farm?

Flex Farms are fully self-contained hydroponic growing systems. They are portable and only require a standard electrical outlet and less than 10 square feet of space. Educational institutions, culinary operations, healthcare organizations, nonprofits and families everywhere are using Flex Farms to produce harvest after harvest of nutritious vegetables, herbs and more!

### SAFE

Designed to protect against agriculture-based food safety concerns

### SIMPLE

Minimal maintenance with only one mechanical part - no green thumb required!

### VERSATILE

Mobile with numerous applications

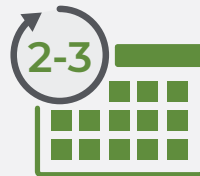

## Unleash the power of fresh food with a Flex Farm

**COSTS LESS THAN \$1.50 A DAY TO OPERATE**
